PROFILE

I consider myself a self-taught person, I like to solve problems and look for opportunities to develop my skills.

I studied industrial engineering and was always curious about programming. I recently completed the Platform 5 Bootcamp, in which I got theoretical and practical experience in the latest Full Stack development technologies.

I am currently looking for my first IT job and very excited to continue learning.

I feel more comfortable working in Front End but I can adapt to new challenges.

PROGRAMMING LANGUAGE

JavaScript

BACK END

Node Js - Express - PostgreSQL - Passport

FRONT END

HTML - CSS - React Js - Redux - Bootstrap - Chakra UI - Material UI

OTHERS

GitHub - Postman - Trello

STUDIES

FULL STACK DEVELOPER

PLATAFORMA 5 | CODING BOOTCAMP

JAN 2022 - APR 2022

More than 800 hours of intensive theoretical and practical training where I was able to cover the latest Full Stack development technologies, applying what I learned in real projects, both group and individual.

INDUSTRIAL ENGINEER

UNIVERSIDAD CATÓLICA ARGENTINA MAR 2012 - MAY 2018

PROJECTS

• TMDB | FEB 2022

Individual project that consumes The Movie Database API, where you can register a user, search and view movie details, save favorites.

Technologies: PERN, Sequelize, Passport.

• E-COMMERCE | REACTSPORT | MAR 2022

Group project in which in two weeks we developed an Ecommerce of sports products, using SCRUM methodology.

Technologies: PERN, Sequelize, Chakra UI.

• NET GLOBAL | PRÁCTICA PROFESIONAL | APR 2022

Group project that allows a security company to manage and control the presence of security guards within the different branches, through a responsive web where data is managed and a PWA/mobile application for each user/security guard.

Technologies: PERN, JWT, Sequelize, Redux, FullCalendar.
